## Purpose and structure

AGATKA PLUS orchard mower is designed for mowing with the possibility of simultaneous shredding grass and weeds in orchards, parks and gardens, plantations of berry bushes, etc.

It is characterized by its simple and robust construction and reliable operation.

Mower is mounted on three-point linkage (category 1 or 2, depending on the order).

The cutting height is regulated by the rear supporting shaft and the tractor's hydraulic lift, and the operation is possible with the mounting in the axis of symmetry of the tractor and with the asymmetric mounting.

## **Technical specifications**

Mounting method	Three-point linkage from the back. Category 1 or 2	
Drive	From the tractor PTO by articulated telescopic shaft and angular gear	
PTO rotation	540 turns / min	
PTO	400 N / m	
Slope mowing area	12 °	
Working unit	The rotor with replaceable blades	
Number of replaceable blades	4	
Number of replaceable counter-blades	1	
Power requirements	7 - 10 kW (9.52 – 13.6 KM)	
Cutting width	1 150 mm	
Cutting height	Min. 20 mm	
Cutting height regulation	Manual by supporting wheel and the tractor's hydraulic lift	
Working speed	4 - 12 km / h	
Width	1 220 mm	
Length	1 540 mm	
Height	850 mm	
Weight	120 kg	

Edition/ actualisation date 2015-03-05 / 2015-03-05	Product Card	SKIERNIEWICE	Page <b>2</b> from <b>2</b>
Name of the machine	Mower AGATKA PLUS
