

Full-row berry harvester pull-type OSKAR A01

The berry harvester OSKAR A01 is the latest version of the harvester designed to collect berries on plantations prepared for mechanical harvest from the full row such as blackcurrants, redcurrants and white-currants, Aronia (chokeberries), gooseberries, Haskap (honeyberries), autumn-fruiting raspberries, saskatoon berries and rose hips.

The accuracy of fruit harvesting depends on the size of the shrubs and the method of running the plantation. The accuracy of harvesting from a properly managed plantation is above 98%, and the amount of fruit contamination does not exceed 1%.

The harvester is characterized by high-quality workmanship, fully equipped and unique features:

- Steering wheels
- Protection roofs
- Drive and working light
- Adjustable width for transport and working positions
- Wireless control panel (Up to 80 meters)
- Collecting fruits from the low shrubs without losses

Technical Specification

Mounting method to tractor	3-point linkage Category 2
Shaking fruits Head	2 (920, BOS or Aronic)
Tractor Capacity	Min. 44 kW/60 HP
Number of harvested row	1
Harvesting Capacity	Up to 0.5 ha/hour
Harvest Accuracy	Up to 98%
Speed	0.8 to 2 km/h
Impurities %	< 1%
Drive of working units	Hydraulic pump through the transmission
Drive	External hydraulics of the tractor
Prędkość obrotowa wentylatora	0 - 1000 rpm
Staff Required	Operator + 2
Height	2 400 → 2 450 (mm)
Length	5 000 → 6 400 (mm)
Width	2 880 → 4 600 (mm)
Weight	3 600 Kg

Index: Harvesters

Self-propelled berry harvester OSKAR 4 WD:

- OSKAR 4WD is intended to collect berries such as: blackcurrants, redcurrants, aronia (chokeberries), gooseberries, Haskap, autumn-fruiting raspberries, saskatoon berries, rose hips & **blueberry by OSKAR 4WD Plus**.
- Engine certified stage V (ECO) with low fuel consumption & Air-conditioned operator's cabin

Pull-type berry harvester OSKAR A01:

- OSKAR A01 is intended to collect berries such as: blackcurrants, redcurrants, aronia (chokeberries), gooseberries, Haskap, autumn-fruiting raspberries, saskatoon berries, rose hips
- The harvester is characterized by high-quality workmanship, fully equipped and unique features

Half-row berry harvester JAREK 5:

- Equipped with two shakers
- Harvester is intended to collect black and redcurrants, gooseberries, saskatoon berries and rose hips
- The accuracy of harvesting from a properly managed plantation is above 98%, and the amount of fruit contamination does not exceed 1%.

Half-row aronia harvester ARONIC:

- Equipped with one shaker with increased
- The accuracy of harvesting from a properly managed plantation is above 98%

Half-row raspberry JAREK 5R & Haskap harvester JAREK 5H:

- Equipped with one special shaker 920ss that can be adjusted by changing the shaking force of the mass of the rotating weight in order to be used on different berry fruits
- Equipped with pre-separator that removes minor impurities
- An additional separating conveyor that facilitates removal of damaged Fruits
